The Project is currently being reviewed by the Federal Energy Regulatory Commission ("FERC") in what is called the Pre-Filing Process. FERC will prepare an Environmental Impact Statement ("EIS") to satisfy the requirements of the National Environmental Policy Act. The EIS will be used by FERC to consider the environmental impacts that could result if it approves the Project. FERC is required to review and recommend measures to avoid, minimize or mitigate such impacts.

The Massachusetts Energy Facilities Siting Board ("Siting Board") participates in FERC proceedings for natural gas pipelines to represent the interests of the Commonwealth and its citizens. The Siting Board will hold four public hearings to hear directly from residents, officials, and other interested persons about their concerns relating to the Project. The Siting Board hearings below are separate and distinct from the public hearings being held by FERC.
